

# City of Donald Septic Tank Pumping Schedule

The City of Donald has a unique wastewater system in which each home has its own septic tank, and the City handles maintenance, including regular pumping. Wastewater separates into liquids and solids. The solids (sludge and scum) are retained in the tank until removed by a City-contracted service every 5 years. The liquids then flow into a pump vault chamber and are pumped to sewer lagoons on the west side of town for treatment and disposal. Each system also includes an alarm box to alert residents if there is a problem with the pump.

- ZONE #1:** Last Pumped: 2022    Next Pump: 2027
- ZONE #2:** Last Pumped: 2023    Next Pump: 2028
- ZONE #3:** Last Pumped: 2024    Next Pump: 2029
- ZONE #4:** Last Pumped: 2025    Next Pump: 2030
- ZONE #5:** Last Pumped: 2021    Next Pump: 2026
